

Divar XF Hybrid H.264 Recorder **Enhance your Divar-2 system capabilities**

BOSCH
Invented for life

Do you want to expand your existing Divar-2 system? Get more flexibility? Improve system capability? Add new features or even migrate to IP? Then check out our Bosch Divar XF Hybrid Recorder. Complete with the latest version of Divar Control Center (version 2.5), it enables the perfect upgrade path for your Divar-2 installation.

The updated Divar Control Center brings Divar-2 and Divar XF recorders together. All the recorders can be centrally operated and managed over IP. Divar Control Center software is available for download from our website free of charge, which allows you to upgrade your Divar-2 applications with an improved user interface and Windows Vista support. You can even use a single Bosch CCTV keyboard to simultaneously control both Divar-2s and Divar XFs locally.

Simply expand your Divar-2 installations

With Divar Control Center you can connect and control an unlimited number of Divar-2 and Divar XF units from a single workstation over IP. The Control Center's easy-to-use, intuitive user interface gives you access to your recorders and cameras in seconds, putting you in control with confidence.

Local control via a Bosch CCTV keyboard

Using a single Bosch CCTV keyboard you can now control a total of 30 Divars, combining a maximum of 16 Divar XF and 14 Divar-2 in a single system. By using the Bosch Video Manager and Keyboard Expander you can create a scalable video solution, with a total of 4 Bosch CCTV keyboards to control your system from multiple locations.

Features	Benefits
New Divar Control Center	Centrally operate and manage an unlimited number of Divar-2 and Divar XF units over IP
Bosch CCTV keyboard operation to manage and control Divar-2 and Divar XF in one system	Versatile control options – without needing extensive training to create a scalable video solution
Free of charge upgrade for current Divar-2 owners	Upgrade existing Divar-2 applications with improved user interface and Windows Vista support
Advanced event handling allows events to automatically trigger actions, such as changing recording profiles or moving cameras to preset positions	Save time and money, make it easier for operators, ensure prompt reaction to security alerts and create an automated video surveillance recording solution

Add the latest video management capabilities

The latest Divar XF 2.5 firmware also extends your system with advanced automatic event handling. This helps operators by bringing crucial events to their attention instantly, ensuring prompt, reliable responses to security alerts. Different automated actions can be made depending on the type of event. For example cameras can be moved into pre-determined positions, changes made to recording profiles or multiple screens displayed on each monitor.

Future-proofing built in

Want to get your existing analog Divar-2 system ready for the future? Divar XF lets you add 8 H.264 IP cameras using your existing IT network. As both IP and analog cameras are controlled in exactly the same way, it's a breeze for any operator to use this state-of-the-art technology.

Ideal for growing and hybrid (analog and IP camera) applications, Divar XF makes your current Divar-2 system more powerful and flexible than ever before.
